

acadience®
learning online

Acadience® Learning Online (ALO)

is a digital platform that allows educators to enter scores, administer measures online*, and receive immediate results and actionable data through an interactive dashboard. ALO enables educators to quickly identify student needs and make informed decisions regarding instruction and intervention.

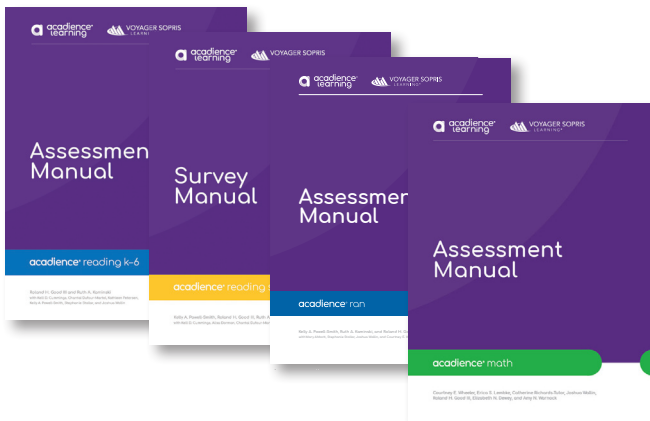

Features of Acadience ALO

- Includes a progressive web application that provides quick administration of both benchmark and progress-monitoring assessments* on touch-screen devices such as tablets or iPads.
- Measures that are digitally administered are automatically scored to provide a seamless transition between assessing and viewing results
- ALO includes initial goals and custom goal setting using both the Benchmark and Pathways of Progress™ frameworks
- Interactive dashboards let educators organize results in meaningful and actionable ways and print reports at the student, class, school, and district levels.
- Districts/Schools using ALO for both Acadience Reading and Acadience Math can access both seamlessly without logging out of the system.

**Manual score entry is available for all assessments except Acadience Survey. Digital administration is currently available for Acadience Reading K–6, Acadience RAN, Acadience Survey and Acadience Math (Early Numeracy measures).*

Acadience Learning Online supports these Acadience Learning assessments:
