Every student with dyslexia can succeed with appropriate and timely instruction. Help each student conquer reading challenges and succeed in school and in life.
With the right professional development, teachers can appropriately support students with dyslexia.

The LETRS® suite of research-based literacy professional development enables teachers to apply best practices for all students, especially targeting those who are struggling with underlying language learning problems. It is ideal preparation for general education teachers who work with students with dyslexia and other language-based reading challenges. The course of study aligns very closely to the IDA’s Knowledge and Practice Standards for Teachers of Reading.

The professional development prepares teachers to teach Structured Literacy and to use good instructional programs effectively. The emphasis is on early identification and appropriate classroom instruction for prevention of reading failure, within a broad and science-based view of reading development.

LETRS helps literacy educators understand:

- What must be taught during reading and spelling lessons to obtain the best results
- How to explain spoken and written English language structures to students
- Why reading instruction has several key components, how they are related, based on current scientific research
- How to interpret individual differences in student achievement, based on valid and reliable assessments and theoretical models
- How to implement instructional routines and activities, and differentiate instruction for all students

With consultive support, apply and refine institutional strategies and systems supportive of the Structured Literacy Approach effective for all students including those with dyslexia.

Every student—including those with dyslexia—can improve their language achievement and feel the joy and pride of accomplishment with the right combination of appropriate instruction, support, and research-based learning solutions. Turn literacy struggles into successful learning experiences with language-based explicit, systematic instruction and solutions featuring a Structured Literacy approach.

Structured Literacy addresses all of the essential components of reading, plus oral language and writing and is the approach endorsed by the International Dyslexia Association’s Board of Directors.

Structured Literacy is:

• Systematic and Cumulative. Material is organized to follow a scope and sequence that is a progression of easier to more difficult language concepts and structures. Each new step must be based on concepts previously learned.

• Explicit Instruction. All instruction should deliberately teach all concepts with continuous student-teacher interaction. It is not assumed students will naturally develop an understanding of these concepts on their own, through exposure to text, or through incidental instruction.

• Diagnostic Teaching. The teacher must use diagnostic assessments to carry out individualized instruction. Both formal and informal assessments are used for screening, progress monitoring, and educational diagnostics.

LANGUAGE!® Fourth Edition is an intensive, comprehensive literacy curriculum for students in grades K–12 who are substantially below grade-level expectations. With explicit, systematic instruction following the Structured Literacy and multi-sensory approach that is proven to accelerate the growth of struggling readers and nonreaders, LANGUAGE!® Fourth Edition integrates instruction in foundational skills, setting, vocabulary, fluency, grammar, comprehension, and spoken English.

Voyager Passport® is a targeted small-group, evidence-based literacy intervention for K–5 students. The program’s explicit, systematic instructional delivery is focused on phonology, phonemic awareness, phonics, vocabulary, fluency, and comprehension. Voyager Passport’s daily lesson framework, formative assessments, and differentiation supports align to the Structured Literacy approach.

Acadience® Reading K-6 is a universal screener used to identify students at risk for reading failure, including students with dyslexia or those at risk for dyslexia. It provides early screening and measurement of student progress; enables individualized support for adequate progress; and directs evaluation of the effectiveness of the school-wide system of instruction and support.

Read Well® is a comprehensive research-based reading and language arts solution that helps students build critical skills. Read Well has many meaningful instructional components that support students with dyslexia or other language disabilities.

RAVE-O® is a small-group, evidence-based literacy intervention curriculum that aligns with the Structured Literacy approach and is designed to address challenges faced by students with dyslexia at this age.

The New Herman Method® is a successful small-group reading intervention for struggling students that incorporates the Structured Literacy approach.
